26th Nov 2021

Dear Madam, Sir,

Holder of a master's degree in the Environnemental management obtained during the year 2021 at the Université Libre de Bruxelles, I would like to submit my application for the the job of LCA Analyst.

Having already acquired a mining engineering degree in Algeria, during my studies I was able to acquire a solid knowledge of mineral resources, their management and the various impacts linked to their operations.

I am looking for an additional training to my Environmental Management degree, in order to develop my knowledge in business management and better understand the issues related to business administration within organizations in which I will have to exercise the management of the environment.

From these criteria I found that the master you are offering is the most suitable for my training and best suited to my professional projects.

My ambition is to work at an international level, and evolve in the medium term in environmental expertise and management. In the long term I would like to contribute to the development of my native country Algeria, which is struggling to find a real and effective strategy for sustainable development, in particular in the fields of energy, mobility and environmental management.

Dynamic, rigorous and with a great willingness to work and a scientific curiosity, I think I have the necessary qualities to succeed and hope to have convinced you of the relevance of my application.

I will be honored to join your school as of the next school year and I am ready to make every effort to succeed. I am at your disposal to provide you with any useful information, and thank you in advance for your attention to my application.

In anticipation of a favorable outcome, please accept, Madam, Sir, the expression of my most distinguished greetings.
